Notice to Buyer:  
**Exclusion of Warranties and  
Limitations of Damages.**

Seed bearing authorized Indiana Certification labels have only met the minimum requirements outlined in the “Indiana Seed Certification Standards Handbook.”

Seed Certification relies upon samples and records provided by member/applicants which are beyond the control of the certifying agency, (Indiana Crop Improvement Association).

Therefore, Indiana Crop Improvement Association makes no warranties, express or implied, including warranty of merchantability, or fitness for a particular purpose concerning certified seed and hereby expressly disclaims the same.

In no event shall Indiana Crop Improvement Association be responsible for damages, actual, incidental or consequential, regarding certified seed provided by applicant/members and/or

## SOURCES OF CERTIFIED SEED

The growers with listings of certified seed in this directory have only applied for certification of their seed. Final certification will not be completed until cleaned samples have been laboratory inspected and approved by Certification.

**Address correspondence pertaining to Certification to:**  
**Indiana Crop Improvement Association**  
**7700 Stockwell Road**  
**Lafayette, IN 47909**  
**Ph: 765-523-2535**  
**Fax: 765-523-2536**  
**icia@indianacrop.org**  
**www.indianacrop.org**

The purpose of this booklet is to provide farmers and seedsmen with a handy reference of sources of certified seed **for 2016 planting.**

## SEED CERTIFICATION

Seed is CERTIFIED by Indiana Crop Improvement Association after field and laboratory inspections have been completed according to the standards and rules for certification as approved by the Purdue University Office of Agricultural Research Programs under the law governing seed certification in Indiana.

All purchases of certified seed are to be made directly from growers listed in this directory. It is the growers’ responsibility to supply seed representative of the seed submitted and approved for certification by the Certification Office. It is recommended that the buyer examine the seed and the analysis tag for all seed purchased. **ALL SEED SOLD AS CERTIFIED SEED MUST HAVE AN OFFICIAL CERTIFIED TAG ATTACHED OR IT IS NOT CERTIFIED.** The Association does not guarantee seed purchased; however, seed purchased or delivered not meeting certification standards should be brought to the attention of the Association.

# WHEAT

## 25R32

25R32 is a soft, red, winter wheat developed by DuPont Pioneer. Leaf color at booting is green and the flag leaf is recurved, twisted and has waxy bloom. Anther color is yellow. Spikes are awned, mid-dense, tapering in shape and nodding at maturity. 25R32 exhibits a high level of Fusarium head blight resistance along with excellent stripe rust and very good powdery mildew resistance. It has good resistance to spindle streak mosaic and soil borne mosaic virus. It has average resistance to leaf rust and the complex of fungal organisms that incite leaf blights.

25R32 is protected under the 1994 Plant Variety Protection.

## 25R40

25R40 is a soft, red, winter wheat developed by DuPont Pioneer. Leaf color at booting is green and the flag leaf has a waxy bloom. Anther color is purple. Spikes are awned, mid-dense, tapering in shape and inclined at maturity. Glume color is white/amber.

25R40 has shown very good leaf rust resistance, stripe rust resistance and powdery mildew resistance. It exhibits good resistance levels to fungal leaf blights, soil borne mosaic virus and wheat spindle streak mosaic virus.

25R40 is protected under the 1994 Plant Variety Protection Act.

## 25R46

25R46 is a soft, red, winter wheat developed by DuPont Pioneer. Leaf color at booting is green and the flag leaf is recurved, twisted and has a waxy bloom. Anther color is purple. Heads are awned, mid-dense, tapering in shape and erect at maturity. Glume color is tan. 25R46 has very good straw lodging resistance and strong fusarium head blight resistance. It also has very good wheat soil borne mosaic virus and spindle streak mosaic virus resistance.

25R46 is protected under the 1994 Plant Variety Protection Act.

## SY 483

SY 483 is a soft, red, winter wheat developed by Syngenta Seeds, Inc. Leaf color at booting is green and the flag leaf is erect, twisted and has a waxy bloom. Anther color is yellow. Heads are awnletted, mid-dense, tapering in shape

and inclined at maturity. Glume color is white. SY 483 has shown moderate resistance to powdery mildew and moderate susceptibility to leaf rust, Fusarium and Septoria.

SY 483 is protected under the Title V Certification Option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed.

## SY 547

SY 547 is a soft, red winter wheat developed by Syngenta Seeds Inc. Leaf color at booting is blue-green and the flag leaf is erect, twisted and has a waxy bloom. Anther color is yellow. Spikes are tapering and mid-dense at maturity. SY 547 has tested above average to powdery mildew, soil borne mosaic virus and Septoria nodorum. It has tested average tolerance to current races of stripe and leaf rust and Fusarium head blight. It is known to be moderately susceptible to barley yellow dwarf virus.

SY 547 is protected under the Title V Certification Option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed.

## W1104

W1104 is a soft, red, winter wheat bred and developed by Syngenta Seeds, Inc. It is a relatively short semidwarf variety with medium maturity. Leaf color at booting is green and the flag leaf is erect, twisted and has a waxy bloom. Anther color is yellow. Spikes are apically awnletted, mid-dense, oblong in shape and inclined at maturity. It has shown moderate resistance to the current races of leaf rust in Ohio, Kentucky, and Tennessee. Up to 1.0% variant plants may be encountered.

W1104 is protected under the Title V certification option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed.

## PLANT VARIETY PROTECTION ACT

The developer of a new distinct variety may obtain protection (essentially a patent) for that variety if they choose to do so, provided the variety meets the requirements of the Plant Variety Protection Act of 1970 and amended 1994. Two options for plant variety protection are available to the developer of the variety.

Under the first option, the developer of the variety or their agent may sell either certified or non-certified seed of the variety. If the developer of the variety has reason to believe that anyone is infringing on their rights, they may resort to civil action. The other option (certification option) for protecting a variety utilizes the provisions of Title V of the Federal Seed Act. A variety protected in this manner may be sold by variety name only as a class of certified seed.

It is the responsibility of the seller to inform the buyer if the variety is protected. Each container of seed that is sold should be labeled with a tag indicating the type of protection for which the owner has applied. Under the second option, the label will state: "Unauthorized Propagation Prohibited - To Be Sold By Variety Name Only as a Class of Certified Seed - U.S. Protected Variety."

In Indiana, the proper statement is preprinted directly on the face of every certified seed tag used on seed of varieties protected under the "certification option."

## VARIETIES ELIGIBLE FOR CERTIFICATION IN INDIANA

All crop varieties certified annually by the association are listed and described in the Summer and Winter editions of the Indiana Seed Directory.

As new varieties are released and as older varieties fade from the scene, the total list of eligible varieties becomes rather long and somewhat meaningless.

Any questions relating to the eligibility of a specific crop variety for certification should be directed to Indiana Crop Improvement Association. A complete list of all varieties certified in recent years is maintained.

**ICIA  
QUALITY ASSURANCE  
PROGRAM**

<p>Field inspected and laboratory tested by the Seed Improvement Agency in the State of Origin</p>
--

The following companies have produced seed under the Quality Assurance Program. This program provides an unbiased quality control system of field inspection, laboratory testing and post-season growout testing for varieties, brands, and blends.

Seed carrying the "ICIA Inspected" green tag has met the minimum genetic standard of not more than .10% off-type plants or seeds based upon the breeder's agronomic description.

Participation in this program illustrates these companies' efforts to use effective quality control in seed production, conditioning and marketing. The services and records generated under this system provide quality assurance for every customer.

For more information regarding specific products produced using the QA Program in 2014, please contact the participating company.

## NOXIOUS WEED SEED FREE FORAGE AND MULCH CERTIFICATION

## IMPORTANT

There is a growing demand in North America for the use of certified noxious weed seed free forage and mulch as a preventive program to limit the spread of noxious weeds. This voluntary certification program is designed to assure that forage (hay, cubes and pellets) and mulch sold with proper certification identification meets minimum standards designed to limit the spread of noxious weeds. Buyers are provided assurance that forage and mulch certified through this program meets these minimum standards.

The Indiana Crop Improvement Association has been designated as the official Noxious Weed Seed Free Forage and Mulch Certification Agency in Indiana by the Director of Purdue Agricultural Research Programs in consultation with the Indiana State Chemist Office. Program standards comply with the Regional Weed Free Forage Certification Standards developed by the Regional Weed Free Forage Committee of the North American Weed Management Association. The Regional Weed Free Forage Committee has established minimum standards to allow uniform participation by states and provinces in the program. Forage and mulch certified under the ICIA certification program with proper certification markings attached will be eligible to be shipped into restricted areas in the United States and Canada where only forage and mulch certified under the Regional Forage Certification Standards can be used.

The following producers have applied for certification of noxious weed seed free forage and/or mulch:

### STRAW

#### **Bryan Farms**

2460 South 400 East  
Monroe 46772 260/692-2552

#### **Donald Conner**

10411 N Division Road  
Fountaintown 46130 317/861-5891

### **FOUNDATION SEED AVAILABILITY LIST**

For information regarding foundation seed for the public, certified, named varieties and the publicly developed varieties for brand labeling, contact:

#### **Agricultural Alumni Seed Improvement Association**

702 SR 28 East  
PO Box 158  
Romney, Indiana 47981  
Ph: (765) 538-3145  
TF: (800) 822-7134

For several years, Indiana Crop Improvement Association has attempted to provide a list of crop varieties protected under the U.S. Plant Variety Protection Act. As more and more varieties are developed and protected, it becomes nearly impossible for us to include a list which would cover all varieties of all crops under protection in the U.S. Therefore, the list we provide will specifically include:

1. Those varieties of crops protected under Title V Certification Option that are being produced in Indiana

2. Those varieties that are protected without Title V Certification Option that are being certified in Indiana. We are not listing protected varieties that do not use certification in Indiana, nor some that are protected under Title V (certification option) that are not being produced in Indiana.

A complete listing of all protected varieties is available in the "Official Journal of the Plant Variety Protection Office" which may be obtained free upon request from:

Plant Variety Protection Office  
10301 Baltimore Blvd.  
National Agriculture Library, Room 401  
Beltsville, Maryland 20705-2351  
Phone: 301-504-5518 Fax: 301-504-5291

**The following is a list of varieties we are providing using the above criteria.**
